

Safety Bulletin

Safety Bulletin # 15-
22

ATTENTION

Pedestrian Safety

Although walking is considered to be a healthy mode of transportation, close to 5,000 pedestrians are killed in traffic every year

The need for enforcement:

- Un-enforced laws will be ignored
- Enforcement gives credibility to engineering and education interventions
- Increases driver awareness
- Increases compliance and saves lives
- Enhances “walk ability” of communities

Tips for Walking Safely:

- Be alert and attentive to the motorists and pedestrians around you.
- Obey traffic signals and signs. They are there to keep you and others safe.
- Wear light-colored or reflective clothing at night to be more visible to drivers.
- Never walk more than two abreast.
- Use Crosswalks whenever they are available.
